Senior Executive, Software Quality Assurance Engineer

CliqPack Ltd. (Hybrid - Full Time) October 2023 – June 2024

Software Quality Assurance Engineer

ArolloTech Limited (Hybrid - Full Time) January 2020 – December 2022

PROJECT

Name: Tazamun HMS (ODOO HMS - Backend HMS - Frontend)

Tazamun HMS is a Hotel Management System App that centralizes booking reservations across all hotels, automates routine tasks like guest check-in, room assignments, billing, and task scheduling, and streamlines front desk and customer management processes to improve guest satisfaction.

Role: Manual Testing on Odoo Applications (Local, Staging & Production Server

Name: CLICK-N-MANAGE (Live QAServer Android iOS)

Click-N-Manage is a quality management app that allows registered users to manage their products and services. Users with defined role permissions have different access privileges to complete their jobs. The app makes on-the-go operations easy and helps manage tasks efficiently.

Role: Manual & Automation Testing on Local, Cloud, Web & Mobile Applications (Local, Live & QA SERVER)

Name: Myday|CliqProperty (Live FrontEnd BackEnd Android)

Discover the ultimate solution for efficient and organized real estate property management with our comprehensive Property Management Software. Designed to meet the diverse needs of property managers, owners, tenants, and real estate professionals, our feature-rich application empowers you to streamline tasks and enhance productivity.

Role: Manual & Automation Testing on Local, Web, Staging & Mobile Applications (Web, Local, Staging & Production Server)

Name: BuyPower (Staging Server)

BuyPower is a cutting-edge company at the nexus of the real estate industry. We empower like-minded individuals with a shared passion for properties to buy, sell, and develop assets seamlessly, transforming the traditional experience

Role: Manual Testing on Web & Mobile Android Applications (Local, Staging & Mobile)

TECHNICAL SKILL

Programming Language: Java

Platforms: Windows 10, Windows 11, macOS, Android OS, and iOS

Browser: Chrome DevTools

Database: POSTGRESQL

Software Project Management: JIRA, Asana, Trello, & Confluence

Mobile Application: Native & Flutter Application

REST API: Postman

Editors: Eclipse IDE, Visual Studio Code & Notepad++

Software Development: Waterfall, Agile & Scrum

Markup Language: HTML5 & CSS3

Automation Tools: Selenium, Appium, Cypress, Playwright, TestNG, JUnit, & ExtentReports

Performance & Load: Apache JMeter

Test Plan Documentation: Google Doc

Test Case Design & Scenario: Google Sheet

Test Release Notes: Jira, Google Sheet & Google Doc

Bug Test Reports: TestRail, Google Sheet & Google Doc

Version Control & Repository: Git & GitHub

UI/UX Software: Figma

CERTIFICATION

Issuing Organization: Test Automation University

- Selenium WebDriver with Java
- Introduction to TestNG
- API Test Automation with Postman
- Exploring Service APIs Through Test Automation
- Acceptance Test-Driven Development for the Front End
- Continuous Integration with Jenkins
- Setting a Foundation for Successful Test Automation
- Automating your API test with REST Assured

Issuing Organization: Coursera

- Interactivity with JavaScript
- Introduction to CSS3
- Introduction to HTML5

ACADEMIC QUALIFICATION

Software Engineering and Information Technology
Institute: Coursera
Year: 2015-2017

Bachelor of Computer Science & Engineering
Institute: University of Liberal Arts Bangladesh
Year: 2011-2013
